Comprehensive FAQs

Q: Can Avery labels template 11196 be used with non-Avery printers?

A: While the template is optimized for Avery's label printers, it can often be used with other thermal or inkjet printers by adjusting settings to match the template's dimensions. However, Avery's printers are designed to ensure the best alignment and adhesion, so results may vary with third-party devices.

Q: What types of label stock are compatible with template 11196?

A: Avery labels template 11196 works with Avery's standard label stocks, including matte, glossy, and waterproof varieties. For best results, use Avery's recommended stocks, which are engineered for optimal adhesion and print quality. Third-party stocks may not align perfectly with the template's margins.

Q: How do I create labels using template 11196 in Microsoft Word?

A: Open Microsoft Word, go to the "Mailings" tab, and select "Labels." Choose "Avery" as the manufacturer and enter "11196" as the product number. Customize the label content, adjust alignment if needed, and print. Avery also provides downloadable templates for Word to simplify the process.

Q: Is Avery labels template 11196 suitable for shipping labels?

A: Yes, the 11196 template is commonly used for shipping labels, especially for smaller packages. However, ensure the label size meets carrier requirements (e.g., USPS, FedEx). For larger shipments, Avery offers templates with different dimensions to accommodate varying package sizes.

Q: Can I print Avery labels template 11196 on regular paper?
